

Stone Ridge Home Owners Association

Garbage Can Policy

Only Garbage and Recycling containers that are provided through the trash/recycling collector may be stored outside as long as the following guidelines have been met:

1. Only the provided containers may be stored outside, NO other containers may be stored outside.
2. The containers must be stored on the side or rear of the house. At NO time should containers be stored in front of home/garage.
3. All containers must not be visible from direct sight from the road. In order to provide that the containers are not visible, Homeowner is responsible for installing screening to obstruct the visibility. All screening is to be submitted for approval through a Modification Request for Board approval. Approved screenings would include: plantings, (ex. Arborvitaes) or vinyl fence.
4. Containers should only be put curbside for pick up starting at dusk the day prior of pick up and should be returned to stored position no later than dusk the day of pick up.
